The University of Texas Rio Grande Valley MATH 4346 – 01R (Integral Transforms) Syllabus for Summer II 2023

Classroom: EMAGC 1.208 **Time:** M-F, 4:45pm – 6:15pm, July 13, 2023 – August 18, 2023

Instructor:

Dr. Zhijun (George) Qiao <u>Office: MAGC 3.722, Phone: 665-3406 (W)</u>, Email: <u>zhijun.qiao@utrgv.edu</u> Webpage: <u>http://faculty.utrgv.edu/zhijun.qiao</u>

Office hours: M &W 11:30am-12:30pm (In Person at MAGC 3.722 or via Zoom at https://utrgv.zoom.us/j/2824166420) or by appointment.

Prerequisite:

A student is required to have at least C or higher in MATH 3341. The student not meeting this requirement may be asked to drop the course.

Textbook: Required textbook:

- 1. An Introduction to Integral Transforms, 1st Edition, by Baidyanath Patra, Copyright 2018, ISBN 9781138588035, 428 Pages 7 B/W Illustrations, Published February 12, 2018 by CRC Press
- Fourier Series and Integral Transforms, 1st Edition, by Allan Pinkus & Samy Zafrany, Cambridge University Press, 1997, <u>https://www.cambridge.org/core/terms</u>. https://doi.org/10.1017/CB09781139173117

Instructor will provide a free pdf version for the chapter needed.

Topics: Fourier Transform, Fourier Sine and Cosine Transforms, Laplace Transform, and Their Applications.

Software: Students are encouraged to use the math software such as Maple or Matlab to verify some results or do some calculations.

Objective:

This course is an introduction to transform analysis based on the theory of Fourier and Laplace integrals. Topics include contour integration, inverse formulas, convolution methods, with applications to mathematical analysis, differential equations, and linear systems.

Student Learning Outcomes: After completing this course students will be able to

- 1. Understand the intellectual structure of integral transforms and its major theorems, definitions, axioms, and problems;
- 2. Understand the definitions, axioms, major theorems and properties underlying the Fourier transform, Laplace transform, and other integral transforms;
- 3. Apply the concepts of integral transforms to solve problems in which their use is fundamental to obtaining and understanding the solution;
- 4. Apply integral transforms to solve ordinary differential equations, partial differential equations, difference equations;
- 5. Write mathematics in a precise, effective, and understandable way.

Course Coverage

This course will cover the following topics:

Fourier Transforms: Definition, Basic Properties, Examples Inverse Fourier Transforms Poisson's Summation Formula Gibb's Phenomenon

Fourier Sine and Cosine Transforms

Applications of Fourier Transforms Ordinary Differential Equations Partial Differential Equations

Laplace Transforms:

Definition, Basic Properties, Examples Convolution Theorem Differentiation and Integration of Laplace Transforms Inverse Laplace Transforms

Applications of Laplace Transforms Ordinary Differential Equations Partial Differential Equations Transfer Function and Linear System Fractional Differential Equations

General Grade Policy

Homework and Projects – Homework assignment is assigned daily and will consist of problems and reading from the textbook and occasional handout. Projects are based on the homework problems. A project will be taken two weeks, namely, ~ 3 times in the whole semester. Projects will be designed in two formats: each student gives presentation based on the homework, and the other is to solve some physical problems I will assign. It is strongly recommended that students work all those homework problems since projects score are used to determine your project grade. Completing the assignments is the single most important part of this course. You will be expected to spend, on average, about 4 hours each week to complete the assignments. The assigned problems will not be collected or graded, but they will form the basis for projects, midterm exams, and the final exam. I will select your best 2 of your project scores in final grade. A homework assignment sheet will be delivered to everybody on the 1st day class. No late re-project will be accepted.

Tests – There will be one one-hour test. All test problems must be taken during their scheduled times. The test time will be announced in advance (basically, a test will be given every two topics or chapters), and a brief review will be given before each test. All students must show their work on the tests. Score will be provided to you separately. No re-test opportunities.

Final Exam – The <u>comprehensive</u> final exam has been scheduled on 8/18/2023, Friday 4:00pm - 5:45pm. All students must take the final exam on the scheduled time. A summary review will be given in the class before the final exam.

Grading – The course grade will be based on HW/Quizzes/Discussion Board

Best 2 out of 3 projects at 75 pts each	150 pts
Midterm Test	100 pts
Comprehensive Final Exam	100 pts
Total	400 pts

The course grade will be assigned according to a scale no higher than A(90-100%), B(80-89%), C(70-79%), C(60-69%), F(below 60%).

THERE WILL BE NO MAKE-UP EXAMS GIVEN.

If a student is absent during a scheduled major test and quiz, the student must go by the instructor's office during the scheduled office hours to discuss the validity of the excuse. In the case of a valid excuse, the missed test grade will be replaced by the final exam grade. If a student does not have a valid excuse, the grade for the missed test is a zero and cannot be replaced. If you arrive late to a test you will not be given additional time to complete the exam. Anyone arriving to a test after somebody else who took the exam has left will not be allowed to take the exam. Students missing more than one exam may be dropped from the course. With an unexcused absence, a score of 0 will be recorded for the missed HW/Quiz or exam.

Tutoring: you may use online resources as your own study for the homework problem solving.

Classroom Behavior:

- <u>All beepers and cellular phones must be turned off before you enter the classroom.</u>
- Once in class, a student is expected to remain in class for the duration of the class. If a student needs to leave class early, than the student needs to discuss the situation with the instructor before class begins.
- During class students are expected to be courteous to the instructor and other classmates. Examples of discourteous behavior are unnecessary talking, sleeping, tardiness, leaving class while instructor is lecturing, sharpening pencils during the lecture, etc.
- No Food Allowed In Classroom.
- Chronic tardiness and discourteous behavior will not be tolerated and is cause for a student's dismissal from class for the remainder of the semester.

UTRGV Policy Statements

UTRGV requires all electronic communication between the University and students be conducted through the official University supplied systems UTRGV-Mail. Please use your UTRGV-Mail account for all correspondence with me.

Calculators, Cell Phones, and Other Electronic Equipment

Calculators will be permitted for use on exams. Electronic equipment such as cell phones, pocket organizers, tablet or laptop computers, or electronic writing pads or pen-input devices will not be permitted during exams. Please make sure that cell phones are turned off and stored way during class.

MANDATORY COURSE EVALUATION PERIOD:

Students are required to complete an ONLINE evaluation of this course, accessed through your UTRGV account (<u>https://my.utrgv.edu/home</u>); you will be contacted through email with further instructions. Students who complete their evaluations will have priority access to their grades. Online evaluations will be available: July 1 - 8 for summer I semester courses.

<u>ATTENDANCE</u>: Students are expected to attend all scheduled classes and may be dropped from the course for excessive absences. UTRGV's attendance policy excuses students from attending class if they are participating in officially sponsored university activities, such as athletics; for

observance of religious holy days; or for military service. Students should contact the instructor in advance of the excused absence and arrange to make up missed work or examinations.

STUDENTS WITH DISABILITIES:

If you have a documented disability (physical, psychological, learning, or other disability which affects your academic performance) and would like to receive academic accommodations, please inform your instructor and contact Student Accessibility Services to schedule an appointment to initiate services. It is recommended that you schedule an appointment with Student Accessibility Services before classes start. However, accommodations can be provided at any time. **Brownsville Campus**: Student Accessibility Services is located in Cortez Hall Room 129 and can be contacted by phone at (956) 882-7374 (Voice) or via email at <u>ability@utrgv.edu</u>. **Edinburg Campus**: Student Accessibility Services is located in 108 University Center and can be contacted by phone at (956) 665-7840 (Fax), or via email at <u>ability@utrgv.edu</u>.

SCHOLASTIC INTEGRITY:

As members of a community dedicated to Honesty, Integrity and Respect, students are reminded that those who engage in scholastic dishonesty are subject to disciplinary penalties, including the possibility of failure in the course and expulsion from the University. Scholastic dishonesty includes but is not limited to: cheating, plagiarism, and collusion; submission for credit of any work or materials that are attributable in whole or in part to another person; taking an examination for another person; any act designed to give unfair advantage to a student; or the attempt to commit such acts. Since scholastic dishonesty harms the individual, all students and the integrity of the University, policies on scholastic dishonesty will be strictly enforced (Board of Regents Rules and Regulations and UTRGV Academic Integrity Guidelines). All scholastic dishonesty incidents will be reported to the Dean of Students.

SEXUAL HARASSMENT, DISCRIMINATION, and VIOLENCE:

In accordance with UT System regulations, your instructor is a "responsible employee" for reporting purposes under Title IX regulations and so must report any instance, occurring during a student's time in college, of sexual assault, stalking, dating violence, domestic violence, or sexual harassment about which she/he becomes aware during this course through writing, discussion, or personal disclosure. More information can be found at <u>www.utrgv.edu/equity</u>, including confidential resources available on campus. The faculty and staff of UTRGV actively strive to provide a learning, working, and living environment that promotes personal integrity, civility, and mutual respect in an environment free from sexual misconduct and discrimination.

COURSE DROPS: According to UTRGV policy, students may drop any class without penalty earning a grade of DR until the official drop date. Following that date, students must be assigned a letter grade and can no longer drop the class. Students considering dropping the class should be aware of the "3-peat rule" and the "6-drop" rule so they can recognize how dropped classes may affect their academic success. The 6-drop rule refers to Texas law that dictates that undergraduate students may not drop more than six courses during their undergraduate career. Courses dropped at other Texas public higher education institutions will count toward the six-course drop limit. The 3-peat rule refers to additional fees charged to students who take the same class for the third time.
